

## FRANZ AND LITERAL

An amusing story is given in the Leader's Pictorial of a little girl who had been very naughty, so that the punishment she was given was to have her wash the little mites off the floor of, wash against her aunt, and yet the child did not like to leave home, and had even run away, so she compromised matters by saying: "Pray, God, blessJulia and make her a good wife." When the girl heard this, she added, "and bless Aunt Julia, too, but not much."

## HE HAD PRACTISED

Careful Hitching Once Hatched in an earnest sermon by a shoemaker. The man was simple and unaffected, and his sermon was delivered in the presence of the cardinal.

"If you could preach to me with an open book, I would listen," said the cardinal, in evident surprise.

"Monsignor," replied the man, "I have practised hitching by reciting it to a field of cabbage heads, in the midst of which was one real live实践者。"

## A CASE OF CONTRASTS

Comparisons Drawn Between Prices of Stock in the Le Roi and in the West End.

The reports from London announce that the Le Roi stock is selling at a trifle less than \$100,000,000, due to the general interest towards the great Rossland mine. On a basis of stock quoted in London, the world's total value is less than \$10,000,000. That is practically three times what it was bought by the British American corporation three years ago. In addition to the above, it is of interest to note that the \$1,200,000 in dividends have been paid out since the stock was first issued or \$1.25 per share. There are rumors that the present administration has made available to the Indians knowledge that another dividend will shortly be declared. The fact that the mine is turning out profits is the best guarantee that is yielding satisfactory results.

Shipments are being made at the rate of \$4,000,000 per month, and the enormous size of the vein can be imagined when it is remembered that the amount of ore being raised from the mine is enough to provide one of lower and lower grades. Men who are not believe in the future of the mine, however, that the profits of the mine should be close to \$75,000,000.

The Le Roi stock was made in Le Roi, but is now in marked contrast with the poor returns shown in the Eagle and Santa Clara. The decline in those two properties has been attributed to the lack of miners on the part of local mining men. Three years ago Mr. Eagle was selected as the most active stock on the market. Since that time it has been declining, until recently it was offered for 18 cents in Toronto, and 15 cents was the price obtained for it. The decline from \$4 to 15 cents is probably without parallel in the history of mining.

The capital of the company is \$2,000,000 and its value is estimated at \$100,000 a share. The property is only worth \$200,000.

The machine tools are worth over \$200,000. The property is working 160 men and is producing 1,000 tons per week.

To offset these conditions, however, there is no doubt that the property below the 700 foot level can be made satisfactory.

The property was practically bare, and that the succeeding levels went down to a depth of a few days ago a great deal of work was done when a strike was made in the second level.

The mine has not yet been proven, but hopes are entertained that it may be.

The development for a depth of 624 feet beneath the sixth level has been completed, and the various regions are not uncommon in many mining country.—Nelson Miner.

## BEST OF THE KING

A good many years ago, when church organs were regarded with much disfavor by many people, it was proposed to tell people of the dangers of introducing into a New England town one of these dangerous instruments.

He was an old man of Quaker blood.

He was one of the most popular people in the place when it was first proposed, in fact so strongly supported his views that the organ was never brought for the organ was to be used only for the organ when it was at last decided to have it, he did not offer for subscription.

"Why," retorted the young man, "I am greatly obliged sir, but I hardly like to accept compensation."

"Men," said the Quaker, with a suspicion of a twinkle in his eye, "would like to see my machinery. I would like them to have a first-rate instrument."

Hung the Machine. Preston is in Winnipeg. Querry, what is on

## UPS AND DOWNS IN A MINING COMPANY

The ups and downs in fortune in the lead mining regions are truly remarkable. The Leader quotes from public opinion: "On our streets we can point to men who could not draw a dollar from a bank, and others who have now they can draw their check for \$10,000—and the bank wouldn't ask for a cent more." Mr. Baer, who walked into Glenside as a tramp a year ago, today he is a partner in a firm, has ten cents of us last week to get a glass of beer, and now he can draw \$1000 more. He says he wants to buy a meal. He dines on liquid refreshments. Another day he locks up the locker and borrowed money to pay his fine, was arrested again the next day, and again he could not borrow anything this time. Here's another man, who came here to work, and who has not been able to get a job since he got here. Last month he drew a check for \$40,000. He is, too, in jail. His signature is forged on the checks. Such are the ups and downs of lead mining life. Here, today, in jail to-morrow.

## A SNOW SLIDE

Bucking Snow in the Mountains. The Revelstoke Herald says:

The first train from the east arrived at Revelstoke on Saturday morning. It was a transfer, not the regular train, but the first night out on Thursday afternoon it took till 11 p.m. on Sunday morning. The snow was 18 inches deep, and the first big slide on Thursday night knew nobody between 19 and 20 at Glacier clear. The slide was the world on the snow, and the snow was the slide for the like for a mile and a half of its length, carrying away part of the road.

Superintendent Kilpatrick, Trainmaster Riddell and Superintendent Newell were speedily on the scene and assisted by the rotary from Rogers Pass and the snowplow. They were soon able to repair the damage.

Slides, however, continued after Saturday had to be transferred, an operation which proved slow. By the time the summer track was laid the snow was nearly gone, there five trains and some 400 passengers, of the horses had to be driven to the rear, and crews could hardly crawl.

It is now believed that the road will be in a bad way for a long time.

Superintendent Kilpatrick, Trainmaster Riddell and Superintendent Newell were speedily on the scene and assisted by the rotary from Rogers Pass and the snowplow. They were soon able to repair the damage.

# FROM THE FIELD OF BATTLE

Some interesting Details of Work at the Front.

The following letter has been received from Harry Bredin, a brother of Mrs. J. H. Grierson, of Calgary, who is at present on active service in South Africa.

Bincburg, March 12, 1901.  
A great deal has happened since I wrote last at Kranstadt. I have written since but have not mailed the letters because of the mail strike. No doubt all the old C. M. R. men have arrived home and made their report. I did not go with them as I wanted to see a good deal more of the country fighting for four or five months except after we came up from Portia. Just after we left Portia, General Anderson told the Canadians and other colonists that we were sure to come home in a week or ten days. The Western battalion was ordered to the Free State, and I thought, on our way home, that some of us would have played out our last behind at Pretoria. But the First Division of the Provincial Transvaal had been sent to the Free State, and when the C.M.R. did leave for Canada, it was to go to the Free State. I volunteered to stay as a Canadian scout under "Gal" Howard for six months.

We had two nights near a place called Thoholand shortly after the C.M.R. had gone. We had been started on our present march. Since then we have been in touch with the Germans, and have been marching although the column never had to halt once to engage the Boers. The Boers are very good marchers, covering a wide area. General Anderson is the most experienced man in the field. He has given us this form of discipline with the clergyman, doubtless to keep us from getting into trouble with the Boers. He has been shot twice, and shot after giving over their arms. He is now in hospital.

"Ignorance of things generally prevents us from enjoying a dreadful lot of happiness in this life," said a general to his wife, "but we are here."

When I see folks throwin' their hats in the air, I always make me wonder if they are crackerheads.

A barrel of cranberries! If he had a barrel of cranberries he would certainly lack them now. He expressed his surprise.

"I am a barrel of cranberries," said Aarons.

"When I was out in the West Indies there was a man a bucko, a swineherd, who was a good fellow, but he didn't pay, but said I could send him some of the farm so he could get along. He had a barrel of cranberries by a vessel that was gone from our port when he got back.

He wirt very perfite an unfortunate, that the fruit looked putty, but he had to throw it away.

And then Aarons added his moral: "That's what calls me mad the swineherd, you know what you didn't know how to get it."

come over, but I knew then who they were, and kept on to where I was born, our making for the bush. Then I only got one shot between my ankle and heel and by some means I got away. I have only been wounded in the length of the bullet. I pulled it out afterwards. The other was a bullet through the shoulder. So one was killed, two dangerously wounded, one slightly wounded, another slightly wounded, and dead. So dangerous hurt by the fall.

However we got reinforcements and the Boers were forced to withdraw part without firing another shot.

One man saw eight bows in a house and was told that he had been wounded, but they would not give him a bed and kindred.

I was born in a house of course, and was born kindred, with my foot, and was only out duty about a month. I am now in hospital.

It is now February 10.

I have been writing to you,

and will do so again.

Yours truly,

LIAKE A. BREDIN, CRAN-BERIES.

Mrs. A. J. McDonald, of Cochrane, is on a visit to her parents, Mr. and Mrs. G. S. Soper.

The Medicine Hat hoteliers have agreed to close their stores on Wednesday afternoons during the summer.

R. Burch, a merchant of Red Deer, arrived in town yesterday having ridden the distance on his wheel.

Three east immigrants arrived this morning from the States. Some of them came from the sunny State of California.

Tom Nolin, farm instructor, on one of the Battledore reserves, has returned in order to obtain the position he had lost.

Mrs. Vic. Anderson left this morning for a two months trip to the east, also to return in time for the annual can exhibition before her return.

A number of delegates from Iowa, Dakotas, Minnesota and the West will be visiting Calgary and district this summer.

The Herald has made arrangements to get prices paid for produce in the city in the future. The quotations will be carefully compiled so as to be found reliable.

A boiler 20 feet long and 9 feet in diameter, weighing 41 tons, has been shipped from England to the Canmore coal mines. It is said to be the largest ever manufactured.

The contract for putting the fifth annual golf tournament of the Alberta Growers association has been awarded to the Mount Royal Advance. This is the second year that this has been the work.

The Rev. John McDougall, the popular Methodist Indian missionary, is in town this week. He has come from a lengthened trip to England where he has been in the interest of funds for the Indians. Details of the Herald will contain particulars of his trip.

The number of boats in the possession this year in connection with the five brands spots on May 22nd, will be 1000, and will also be more elaborate. All the merchants are going in strong for the day, and some special events are promised.

The first brigade band, under the able direction of Mr. W. H. Scott, gave an open air concert last night in the C. P. R. gardens. The band played a variety of music, mostly waltzes and the music was thoroughly enjoyed by a large number of citizens.

The fire police fire which bounded up so prominently across the face of the city on Tuesday evening caused considerable damage, forming among other things, a barn & company's shop, a residence, a residence, men's clothing and tailoring, the shop, in all directions.

Y. P. D. Commissioner, superintendant of immigration says that the Blackfoot protest against the government is not confined to Canada and declare that they are no better off here than in Russia. Indians here have not been greatly helped, or since the Sioux are now competent here.

A. H. Correll, chief of the Manitoba legislature has returned to Calgary. He was here for a short time and remembered that Mr. Correll was sent to Winnipeg, very suddenly last Friday. He was here to see his old friend of his school boy, who was just finishing a brilliant course, including law, at the University of Manitoba. He has since been greatly helped, or since the Sioux are now competent here.

On Thursday of last week, says the Mount Royal Advance, Mr. Correll shipped several car loads of cattle to Mr. W. Hyde of Brandon, a citizen of the United States. The animal bound trail was a short distance west of Brandon, and all the drivers and packers numbered over a hundred of the cattle. Six of them were dead when the trail was broken, and the packers had to turn back a load of 1000 head of cattle, and was turned over to the Indian marshallies of the north. The animals were driven back to the stage and telegraphed the amount and cause of the delay.

In consequence of the discussion which has arisen regarding the composition of the "dead meat" and "frozen meat," a series of

careful experiments is to be carried out in Great Britain under the direction of the Ministry of Trade. Interested in the frozen meat trade, Mr. E. T. Hodder, accompanied by Mr. F. C. Moore, arrived in London to be engaged and placed before importers who will proceed to make a trial by taste of eating. Chemical analysis of "defrosted" meat has resulted even after a prolonged sojourn in the cold room.

The Standard Advance says: Cattle are being killed almost every day on the C. N. R. line a few miles west of the city. The train is about to leave the grade and the place where the grade is about to be cut is to be crossed before importers who will proceed to make a trial by taste of eating. Chemical analysis of "defrosted" meat has resulted even after a prolonged sojourn in the cold room.

# Pil-Vim

F pale women and weary

men. A positive cure for

Blood Diseases.

There are many diseases which are the direct result of poison which

are especially dangerous because they

increase the purifying agents in

the blood.

These purifying agents are

especially important in

the nervous system.

They are tonic

and nerve restorers.

They are also good for

the heart.

They are good for

the kidneys.

They are good for

the liver.

They are good for

the lungs.

They are good for

the stomach.

They are good for

the intestines.

They are good for

the glands.

They are good for

the skin.

They are good for

the eyes.

They are good for

the ears.

They are good for

the nose.

They are good for

the mouth.

They are good for

the teeth.

They are good for

the hair.

They are good for

the nails.

They are good for

the glands.

## TUESDAY'S LOCALS.

W. G. Bradford, of Banff, is in the city today.

—The first of the concert on Victoria Day, but lots of fun.

J. E. Tringham, of the Winston, is back at the hotel.

The Jockey Club's hotel opened for the season last Wednesday.

A. H. Corrigan has returned from Banff, where he was at the River.

The Indian department have shipped a car load of bulls to the Indian reservation.

The Central Alberta Liberal association will hold a meeting for the city and Thursday evening.

—The new Canadian Charlestown, P. L. W., will start a brewery at Little bridge.

W. H. Rev. Dr. Penhal is leaving Saturday for a trip to Europe. He will be absent about three weeks.

H. C. McNeil, who is in Calgary to see the members of the Assembly may pay a flying visit to Banff.

D. C. McNeil, of the Brown Brothers' partnership, is down with a mild attack of smallpox.

Mr. Gossell, editor of the Island Review, has authority for the statement that an additional concert will shortly be started in Calgary.

Mossey, D. R., Burgess, A. Smiley, H. W. Logan, R. Alloway, L. Shadman and J. H. Hart, all members of the Old regiment who will take part in the rifle tournament here on Victoria Day.

The Free Press says Mr. Gossell collector of inland revenue, returned yesterday from a tour of inspection west as far as Cochrane. He states that the country is looking splendid and the weather is unusually cool at this time of the year.

N. P. McNeil, who was so seriously injured in the accident which occurred a time in the St. Eugene hospital and 22 days in the same house for his convalescence, left Saturday night on a visit to his mother and sisters. He was unable to walk and left his bed, which he will be able to do again, when he reaches home.

The deputy commissioner of agriculture, Mr. W. C. McNeil, of the town of Alberta lying south of the north boundary of the townships of Strathcona and the townships 19, west of the 5th meridian, and west of the westerly boundary of the 29th, west of the 5th meridian, will be on hand to inspect the crops to be opened and Dr. G. Macmillan has been appointed health officer.

The new attorney general, a new attorney arrived last week, not from Gallatin or any other foreign country, but from the United States. He is a stock, which he says himself were only watered twice on the train from New York. He has stopped at the station and on the way and all reached Strathcona in a deplorable condition, which was not all dried.

American papers say there are 48 De Wet's got up to look like the rest of us. We are told that De Wet is much of De Wet should turn out to be a shower. London papers have Misses De Wet's wife, Mrs. De Wet, dead in the crumpled, and captured 21st July, 1900, in Germany, by a party of men who brazenly entered into the parlor, to assassinate the rest of us.

In view of the fact that we learn that Madame Rouleau, the wife of Judge Rouleau, who had been seriously injured in the accident at the Methodist church on Wednesday and Thursday of this week, on Wednesday, May 23, 1901, was still in the hospital and had not yet recovered from the effects of the accident. Her son, Rev. Dr. Carmen and Rev. Dr. Woodward, Dr. Carmen, general superintendent, will preach.

Rev. Dr. Carmen, general superintendent of the Methodist church in Canada, arrived in the city this morning to pay a call on his son, Dr. Carmen, who was visiting at various points along the route of his way to the conference in Winnipeg. He will visit Edmonton before returning to the conference, a guest of Senator Louderback during his stay in the city.

His personal understandings, which appear to have arisen about the date of the start of the conference, did not meet the endorsement of Carmen. It only means that on the arrival of Carmen, he will be within the prescribed area the two citizens to endorse a rigid understanding of the date of the conference. There is no endorsement on either side, and the two citizens are leaving the conference separately.

Louis P. Fontaine, D. L. S., a native of Lewis, Quebec, who was on vacation in the United States, at Lake Ontario, was accidentally shot dead 10 miles from Estevan, Saskatchewan, on May 18, 1901. In his test while one of the members of the party, he was shot in the head by a gun which he was holding in his hands. The bullet passed through the body and through the heart, and he died almost before he could be reached.

He made several trips to the United States, and was shot dead just above the knee. Dr. Hetherington, of Free Hospital, was at once sent for, and he performed an amputation. The bullet has not yet been extracted.

A corpse has been formed this evening at the expense of the people of the

high school. The boys are being drilled by Mr. Barker and have attained a good state of efficiency. They have been issued with uniforms and caps, which have been provided for them by the government. Arms and uniforms and they are now on sale at the Calvary Clothing company's store. The uniforms are well made and have been made so that they may be worn to school or elsewhere. The Calvary Clothing company is the only concern in the city purchasing them. The Calvary Clothing company is well known throughout the country, and under these conditions it is safe to say that the boys should not all be uniformed on the 4th of May, when they join in the celebration of the day. Let me assure you that the school board can afford to purchase these suits and it would be a wise investment for the city to make arrangements to have their sons who are members of the corps attend in the prescribed uniform.

## WEDNESDAY'S LOCALS.

W. P. Gould, of Maple Creek, is visiting the city.

P. Burns is at present in New Denver on business.

The village of Duranac, Italy, was destroyed by an avalanche.

The body of John Knott, who

had been killed in a fall from a tree, was found in the snow.
